Al-Mustaqbal University launched the Al-Mustaqbal Week for Sustainable Development event, and as part of this week's activities, the College of Health and Medical Technologies/Department of Medical Laboratory Technologies, in cooperation with the Babylon Health Department, launched an initiative to care for pregnant women in the villages of Babylon and its remote areas. Through it, it aims to provide comprehensive medical care and necessary services to pregnant women during pregnancy, and to provide the necessary examinations free of charge. The initiative also includes several points, including providing specialized medical care for pregnant women, and ensuring the provision of routine and necessary examinations to preserve the health of the mother and fetus. This effective cooperation with

the Babylon Health Department comes within the framework of the commitment to promoting health and health care in society. This initiative reflects the university's commitment to achieving community and medical partnership through which sustainable development can be supported, and highlighting the positive impact that such initiatives can achieve in enhancing the well-being of individuals. And society in general

The Al-Mustaqbal Campaign for Pregnant Care, in cooperation with the Ministry of Health/Babylon Health Department, continued on a weekly basis. This campaign, which was launched within the Al-Mustaqbal Week for Sustainability, aims to achieve the third goal of the Sustainable Development Goals, which is to ensure good health and eliminate poverty. This week's campaign included providing health care services to pregnant women in the Musayyib sector/Nasiriyah village, in addition to distributing food baskets to maintain women's health during pregnancy. The campaign included comprehensive medical examinations, nutritional counseling, and awareness of the importance

of regular health care during pregnancy. Awareness booklets were also distributed to pregnant women containing information about proper nutrition and appropriate physical activity during pregnancy, in addition to advice on how to deal with common symptoms that a pregnant woman may face. These efforts aim to enhance health awareness and ensure the provision of necessary care for mothers and fetuses, which contributes to reducing death rates and pregnancy-related diseases.
