Indicator 17.4.1: Education for SDGs commitment to meaningful education

Institutional Commitment

Al-Mustaqbal University reaffirms its commitment to promoting meaningful education aligned with the Sustainable Development Goals (SDGs) through adopting an educational vision that seeks to integrate sustainability concepts into the academic environment and curricula, while raising students' awareness of their responsibilities towards environmental, social, and economic issues.

During 2025, the University strengthened this commitment by organizing educational and awareness-raising workshops on the Sustainable Development Goals, participating in international conferences and events dedicated to sustainable education, and enhancing cooperation with international organizations and networks concerned with Education for Sustainable Development.

The University also seeks to strengthen the integration of the Sustainable Development Goals across various academic disciplines, connect theoretical knowledge with practical applications, and prepare graduates with the knowledge and skills necessary to contribute to achieving sustainable development and serving the community.

These efforts reaffirm Al-Mustaqbal University's commitment to building a sustainable educational system that integrates the Sustainable Development Goals into its academic culture and educational practices for all students.

Policy Development and Continuous Improvement Methods:

Al-Mustaqbal University is committed to periodically reviewing and developing its Education for Sustainable Development Goals (SDGs) Policy, based on evaluation results, performance indicators, and feedback from colleges, academic departments, and students. This will ensure the continuous improvement of education quality and strengthen the integration of sustainability concepts into all aspects of the educational process.

Impact Ratings

1. Development of Green and sustainable Education:

Al-Mustaqbal University project to develop green programs and courses is a strategic initiative that aims to integrate the concepts of sustainable development and climate change into the university educational system, to prepare a generation of graduates who possess environmental awareness and the ability to face climate challenges.
